AVALANCHE TRIPLE SEAL

- Repairs Metal Leaks in Evaporator, Condenser, Compressor, Filter/Dryer and Accumulator.
- Seals Rubber Leaks in Hoses, Gaskets, and around O-rings.
- Stops High and Low Side Service Port Leaks using the special tool to tighten valve cores.

SMART CLIP placed in air vent continues to change color (White to Blue) for 30 days to confirm leak is sealed and air conditioner is continuing to cool.

INSTALLATION INSTRUCTIONS

1. Remove the white SMART CLIP found in the cap and place it in center air vent in the passenger compartment.

2. Locate both high and low side service ports. These ports will usually have a plastic cap.

3. Remove the red valve core tool found in the cap and hand tighten valve cores by turning the valve core tool clockwise.

4. Start engine and turn air conditioner to maximum cool and maximum air flow.

5. Shake can well. Make sure recharge hose is tightly affixed to the can.

6. Connect the recharge hose to the low side service port by pulling the connector ring back as you push the fitting onto the service port. Make sure it locks in place. The low side service port is the only port TRIPLE SEAL will connect to and is located between the compressor and evaporator.

7. Turn the handle clockwise to pierce the refrigerant can, and then screw counter clockwise to release refrigerant. (Turn clockwise to re-seal the refrigerant can.)

8. Add TRIPLE SEAL while rotating and shaking the can from a 12 o’clock position to the 3 o’clock position. Turn can upside down for two minutes to ensure all contents enter the air conditioner.

9. Remove TRIPLE SEAL can and immediately add refrigerant using the instructions on the refrigerant can or recharge hose.

10. After air conditioner is fully charged, the SMART CLIP in the air vent will change from white to blue. Leave the SMART CLIP in vent and check to see if it continues to change color. If it continues to turn blue for 30 days, the leak is sufficiently sealed. If not, the leak requires mechanical repairs.

11. Recharge hose may be re-used after cleaning with solvent cleaner. Visit acavalanche.com/tripleseal for further instructions.

WARNING: KEEP OUT OF REACH OF CHILDREN. EXPOSURE TO SKIN MAY CAUSE FROSTBITE. FLUSH WITH WARM WATER. IF SPRAYED INTO EYES, FLUSH WITH WARM WATER. IF INHALED, REMOVE TO FRESH AIR AND CALL PHYSICIAN IMMEDIATELY. CONTAINS 1,1,1,2 TETRAFLUOROETHANE (CAS # 811-97-2). This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

DANGER: STORE IN COOL PLACE – NEVER IN PASSENGER CABIN OF VEHICLE AS IT MAY EXPLODE. DO NOT EXPOSE TO TEMPERATURES ABOVE 120°F. DO NOT PUNCTURE OR INCINERATE.

BEFORE USING A/C SYSTEM MUST BE ABLE TO HOLD A CHARGE FOR TWO WEEKS.

CAUTION: ALWAYS WEAR PROTECTIVE RUBBER GLOVES AND EYE WEAR.

Not for use on hybrid/electric vehicles with non-belt driven (electric driven) compressor.
